Dave -

Back in June, we had discussed a meeting, where EPA would make a presentation about our groundwater studies for the Cornell site. We have now reached the point where we can have that meeting. It is primarily a technical presentation, hydrogeologic study findings, groundwater contamination findings, groundwater modeling results, etc., and we have a package of technical information that we will leave with you at that time. The technical presentation will be made by our consultant, CH2MHill.

Because of the location of the Spring Lake and Park Avenue wellfields, I believe that EPA and Middlesex Water have a number of common interests, and I look forward to starting a dialog on

how to address them.

We should be ready for a presentation at the end of January. Please suggest several dates that would work for your group. I think we need a minimum of 90 minutes. We can come to you or, if you would prefer, we could reserve conference space at EPA's Edison facility at 2890 Woodbridge Avenue.

Dear Mr. Brogle,

My name is John Prince with EPA Region 2, and I am a section chief in the Superfund Program. Pete Mannino has been your point-of-contact; however, he has moved to a new position and we have a new project manager, Diego Garcia. I would like a few minutes of your time to discuss the site, when you are free. We are nearing the end of our groundwater studies and I would like to go over some of our findings as they pertain to your Park Avenue well field.

Please reply by email or by calling me at (212) 637-4380, with a convenient time.

Regards,

John Prince

Dave,
 We are all set on our end to meet with you on Monday Feb 13th. We have seven people schedule to attend, do you have room for all of us? Also, do you have a screen or white wall we could use for a short presentation. If not, we can bring our own screen. Please let me know.
 Thanks,
 DG

Sorry Dave - my absence delayed us a few days - I was going to call you later this afternoon and apologize + propose these dates (below), but this is quicker and I need to run to a meeting.

I proposed several dates to you that I had not screened with our team. Leaving me out of the chain will speed things up - I hope that you can confirm one of these dates with Diego, our project manager, and I'll make it work on my end. Feb 6, 13 or 14.

Dave,

I know we asked for a lot of information but would it be possible if you could let me know if either you or someone in your office could help me confirm if the names/addresses listed on the attached spread sheet are connected to your water system. Contacting all of these private well owners is going to take some time and I need to start working on this task so I would appreciate it if you would let me know what you find out so I can plan for it.

Thanks,
 Diego

Hi Dave,

I want to thank you again for meeting with us earlier this week and to follow up on the information we requested. As may recall, we asked if you could provide us with raw water point of entry chemical data (all organics including perchlorate, and inorganics) for Spring Lake, Park Avenue, and any other available well fields (reportedly available from 1983 to the present) and hydraulic data for pumping and static conditions at the MWC wells. In addition, attached is a list of potential private well users within our study area which we asked you could check to see if they are connected to your system. I would appreciate any information you can provide and if you need any clarification on any of these specific questions, please reach me at 212 637-4947 or via email.

Thanks,
 Diego

Dave,

I know we asked for a lot of information but would it be possible if you could let me know if either you or someone in your office could help me confirm if the names/addresses listed on the attached spread sheet are connected to your water system. Contacting all of these private well owners is going to take some time and I need to start working on this task so I would appreciate it if you would let me know what you find out so I can plan for it.

Thanks,
 Diego

Hi Dave,

I want to thank you again for meeting with us earlier this week and to follow up on the information we requested. As may recall, we asked if you could provide us with raw water point of entry chemical data (all organics including perchlorate, and inorganics) for Spring Lake, Park Avenue, and any other available well fields (reportedly available from 1983 to the present) and hydraulic data for pumping and static conditions at the MWC wells. In addition, attached is a list of potential private well users within our study area which we asked you could check to see if they are connected to your system. I would appreciate any information you can provide and if you need any clarification on any of these specific questions, please reach me at 212 637-4947 or via email.

Thanks,

Diego

Dear Mr. Brogle,

My name is John Prince with EPA Region 2, and I am a section chief in the Superfund Program. Pete Mannino has been your point-of-contact; however, he has moved to a new position and we have a new project manager, Diego Garcia. I would like a few minutes of your time to discuss the site, when you are free. We are nearing the end of our groundwater studies and I would like to go over some of our findings as they pertain to your Park Avenue well field.

Please reply by email or by calling me at (212) 637-4380, with a convenient time.

Regards,

John Prince

To whom it may concern,

The EPA in conjunction with the Borough of So.Plainfield have a meeting scheduled for Aug 7th @ the towns Sr.Center. The EPA along with the governing body will be there to answer questions of the public. We feel it would be important for a representative of the water company to attend if for no other reason but to show all parties are working together to resolve any issues. It has been our experience that the public has asked questions however cordial in their approach. I am requesting that a representative from the water company participate in this meeting on Aug 7th. Please advise as to who will be attending and should you have any further questions please do not hesitate to reach out to me.

Thank You in advance for your cooperation.

Dave -

Back in June, we had discussed a meeting, where EPA would make a presentation about our groundwater studies for the Cornell site. We have now reached the point where we can have that meeting. It is primarily a technical presentation, hydrogeologic study findings, groundwater contamination findings, groundwater modeling results, etc., and we have a package of technical information that we will leave with you at that time. The technical presentation will be made by our consultant, CH2MHill.

Because of the location of the Spring Lake and Park Avenue wellfields, I believe that EPA and Middlesex Water have a number of common interests, and I look forward to starting a dialog on how to address them.

We should be ready for a presentation at the end of January. Please suggest several dates that would work for your group. I think we need a minimum of 90 minutes. We can come to you or, if you would prefer, we could reserve conference space at EPA's Edison facility at 2890 Woodbridge Avenue.

Dave -

Back in June, we had discussed a meeting, where EPA would make a presentation about our groundwater studies for the Cornell site. We have now reached the point where we can have that meeting. It is primarily a technical presentation, hydrogeologic study findings, groundwater contamination findings, groundwater modeling results, etc., and we have a package of technical information that we will leave with you at that time. The technical presentation will be made by our consultant, CH2MHill.

Because of the location of the Spring Lake and Park Avenue wellfields, I believe that EPA and Middlesex Water have a number of common interests, and I look forward to starting a dialog on how to address them.

We should be ready for a presentation at the end of January. Please suggest several dates that would work for your group. I think we need a minimum of 90 minutes. We can come to you or, if you would prefer, we could reserve conference space at EPA's Edison facility at 2890 Woodbridge Avenue.

Dear Mr. Brogle,

My name is John Prince with EPA Region 2, and I am a section chief in the Superfund Program. Pete Mannino has been your point-of-contact; however, he has moved to a new position and we have a new project manager, Diego Garcia. I would like a few minutes of your time to discuss the site, when you are free. We are nearing the end of our groundwater studies and I would like to go over some of our findings as they pertain to your Park Avenue well field.

Please reply by email or by calling me at (212) 637-4380, with a convenient time.

Regards,

John Prince

Sorry Dave - my absence delayed us a few days - I was going to call you later this afternoon and apologize + propose these dates (below), but this is quicker and I need to run to a meeting.

I proposed several dates to you that I had not screened with our team. Leaving me out of the chain will speed things up - I hope that you can confirm one of these dates with Diego, our project manager, and I'll make it work on my end. Feb 6, 13 or 14.

Subject: Cornell-Dubilier Electronics Superfund site, South Plainfield

Dear Mr. Brogle,

My name is John Prince with EPA Region 2, and I am a section chief in the Superfund Program. Pete Mannino has been your point-of-contact; however, he has moved to a new position and we have a new project manager, Diego Garcia. I would like a few minutes of your time to discuss the site, when you are free. We are nearing the end of our groundwater studies and I would like to go over some of our findings as they pertain to your Park Avenue well field.

Please reply by email or by calling me at (212) 637-4380, with a convenient time.

Regards,

John Prince

Sorry Dave - my absence delayed us a few days - I was going to call you later this afternoon and apologize + propose these dates (below), but this is quicker and I need to run to a meeting.

I proposed several dates to you that I had not screened with our team. Leaving me out of the chain will speed things up - I hope that you can confirm one of these dates with Diego, our project manager, and I'll make it work on my end. Feb 6, 13 or 14.

Dave -

Back in June, we had discussed a meeting, where EPA would make a presentation about our groundwater studies for the Cornell site. We have now reached the point where we can have that meeting. It is primarily a technical presentation, hydrogeologic study findings, groundwater contamination findings, groundwater modeling results, etc., and we have a package of technical information that we will leave with you at that time. The technical presentation will be made by our consultant, CH2MHill.

Because of the location of the Spring Lake and Park Avenue wellfields, I believe that EPA and Middlesex Water have a number of common interests, and I look forward to starting a dialog on how to address them.

We should be ready for a presentation at the end of January. Please suggest several dates that would work for your group. I think we need a minimum of 90 minutes. We can come to you or, if you would prefer, we could reserve conference space at EPA's Edison facility at 2890 Woodbridge Avenue.

Dave -

Back in June, we had discussed a meeting, where EPA would make a presentation about our groundwater studies for the Cornell site. We have now reached the point where we can have that meeting. It is primarily a technical presentation, hydrogeologic study findings, groundwater contamination findings, groundwater modeling results, etc., and we have a package of technical information that we will leave with you at that time. The technical presentation will be made by our consultant, CH2MHill.

Because of the location of the Spring Lake and Park Avenue wellfields, I believe that EPA and Middlesex Water have a number of common interests, and I look forward to starting a dialog on how to address them.

We should be ready for a presentation at the end of January. Please suggest several dates that would work for your group. I think we need a minimum of 90 minutes. We can come to you or, if you would prefer, we could reserve conference space at EPA's Edison facility at 2890 Woodbridge Avenue.

Regards,

John Prince, Chief

Dear Mr. Brogle,

My name is John Prince with EPA Region 2, and I am a section chief in the Superfund Program. Pete Mannino has been your point-of-contact; however, he has moved to a new position and we have a new project manager, Diego Garcia. I would like a few minutes of your time to discuss the site, when you are free. We are nearing the end of our groundwater studies and I would like to go over some of our findings as they pertain to your Park Avenue well field.

Please reply by email or by calling me at (212) 637-4380, with a convenient time.

Regards,

John Prince
